To Whom It May Concern:

It is wrong to force insurance companies to provide free contraceptives and sterilization. It is wrong to force businesses who have a moral objection to participate and have to pay for abortions and other procedures that are abhorrent to them.

Whatever happened to the spirit of conscience laws to protect against this sort of incursion into businesses and their practices. Ever since abortion was legalized in this country, there has been conflict over this issue. In recent years and with more and more science to prove the viability of the infant in the womb, the opinion of many Americans is that abortion is wrong. People of faith believe it is a sin and they should not be forced by government to provide abortions or aid in the destruction of human life in this way.

No Americans should be forced by the federal government to essentially subsidize services they object to. I again urge you in the strongest way possible to reverse course and remove contraceptives and sterilizations from the list of mandatory preventive services.

Sincerely,  
Dorothy Swanson  
West Columbia, SC 29170
